

YOUNGTRON

**State-of-the-art
assembly services for
SMT and thru-hole
printed circuit boards**

Commitment

Your company's name, reputation and future are riding on every product you bring to market. With today's increasing dependence on electronics, the right contract manufacturer is a critical element in your success.

At YOUNGTRON we understand when you hire us as part of your production team, you bestow on us something far more important than the dollar value of your order: your trust.

We invest heavily in training, customer service, leading-edge capital equipment and strict quality assurance to ISO 9002. These assets enable YOUNGTRON to maintain a mutually beneficial relationship with you for the long term.

Microscopic review assures consistent SMT and thru-hole assembly

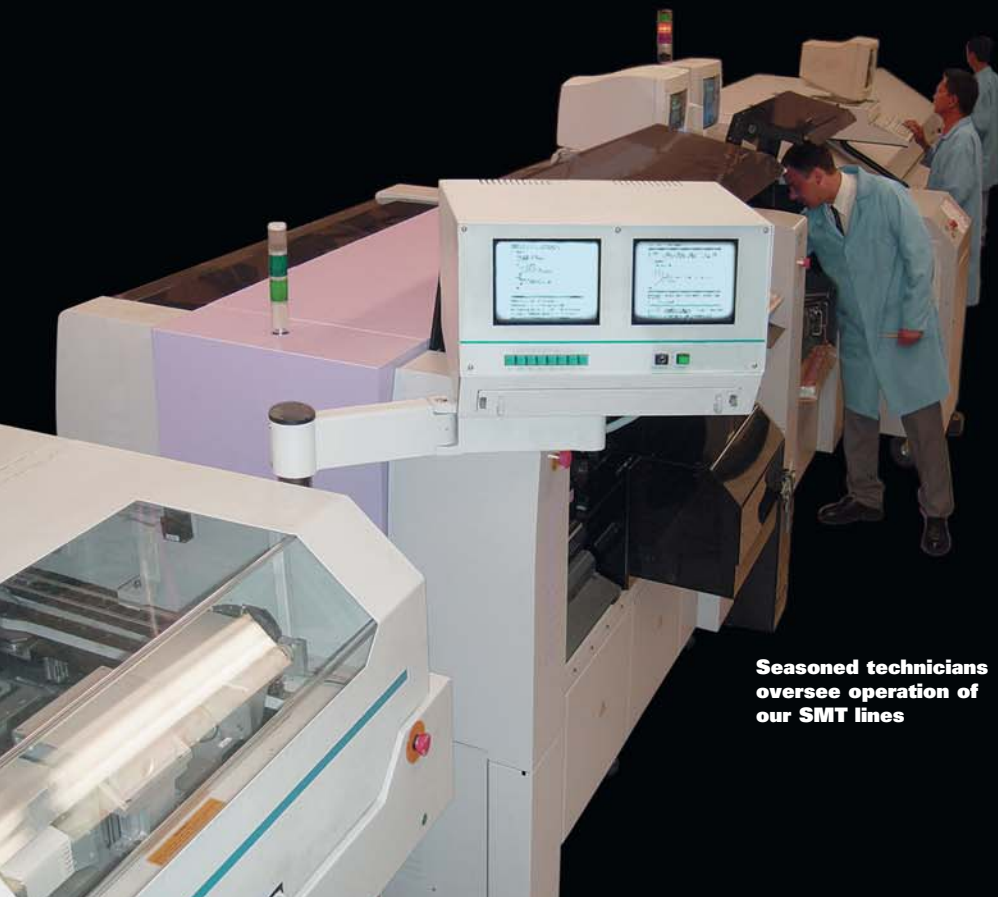

Youngtron's GenRad testing system confirms circuit integrity

Wave soldering and other processes are documented in accordance with ISO 9002

Precise optical inspection verifies components and orientation

Seasoned technicians oversee operation of our SMT lines

Competence and Capability

Our equipment provides full capability for assembly of the latest-generation printed circuit boards.

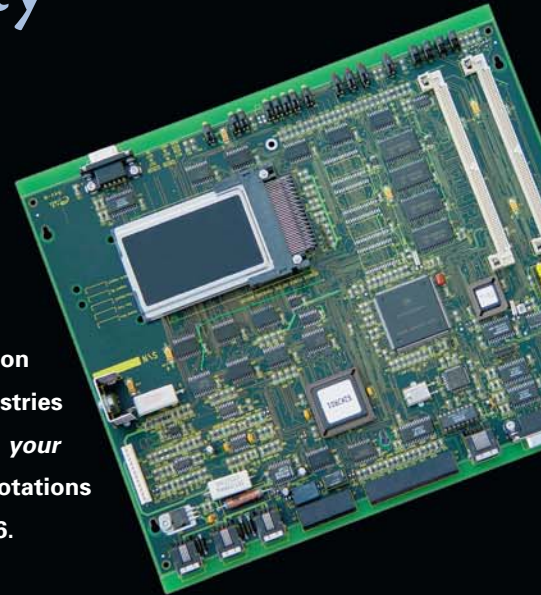

- Surface mount assembly equipment for accurate placement of components
- In-circuit and functional testing
- Fine-pitch and BGA placement
- Automated through-hole capability
- RoHS and Non-RoHS assembly
- Automated vision inspection
- Conformal coatings

We know how important it is to perform reliably. Our workmanship is crucial to the success of your products, and we take this responsibility seriously. Our operators and assembly teams perform to an ISO 9002 registered quality system.

We promise you:

- Consistent high quality
- Fast, flexible turnaround
- Competitive pricing
- Reliable, personal service
- Accurate communication

Youngtron's excellent reputation is known throughout the industries we serve. Make us an asset in *your* value chain! Please call for quotations or information at 215-822-7866.
