

YOUNGTRON

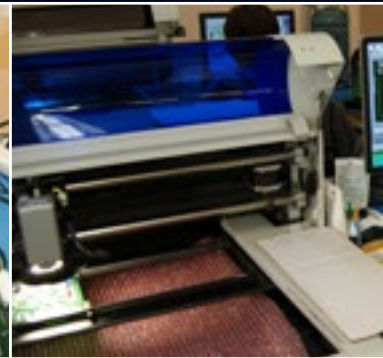

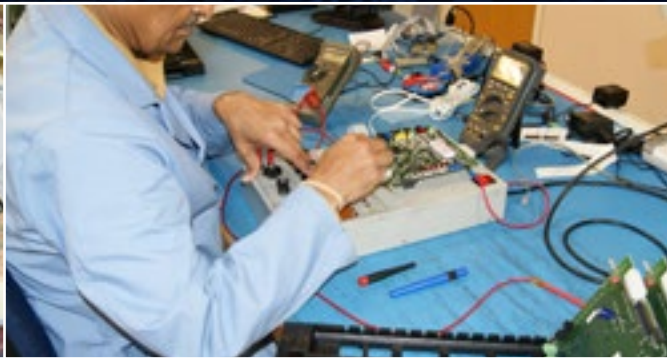

State-of-the-Art Assembly Services
for SMT, Thru-Hole Printed Circuit Boards and
Final Assembly

YOUNGTRON

Functional and in-circuit tests provide consistent process feedback

Microscopic review assures consistent SMT and thru-hole assembly

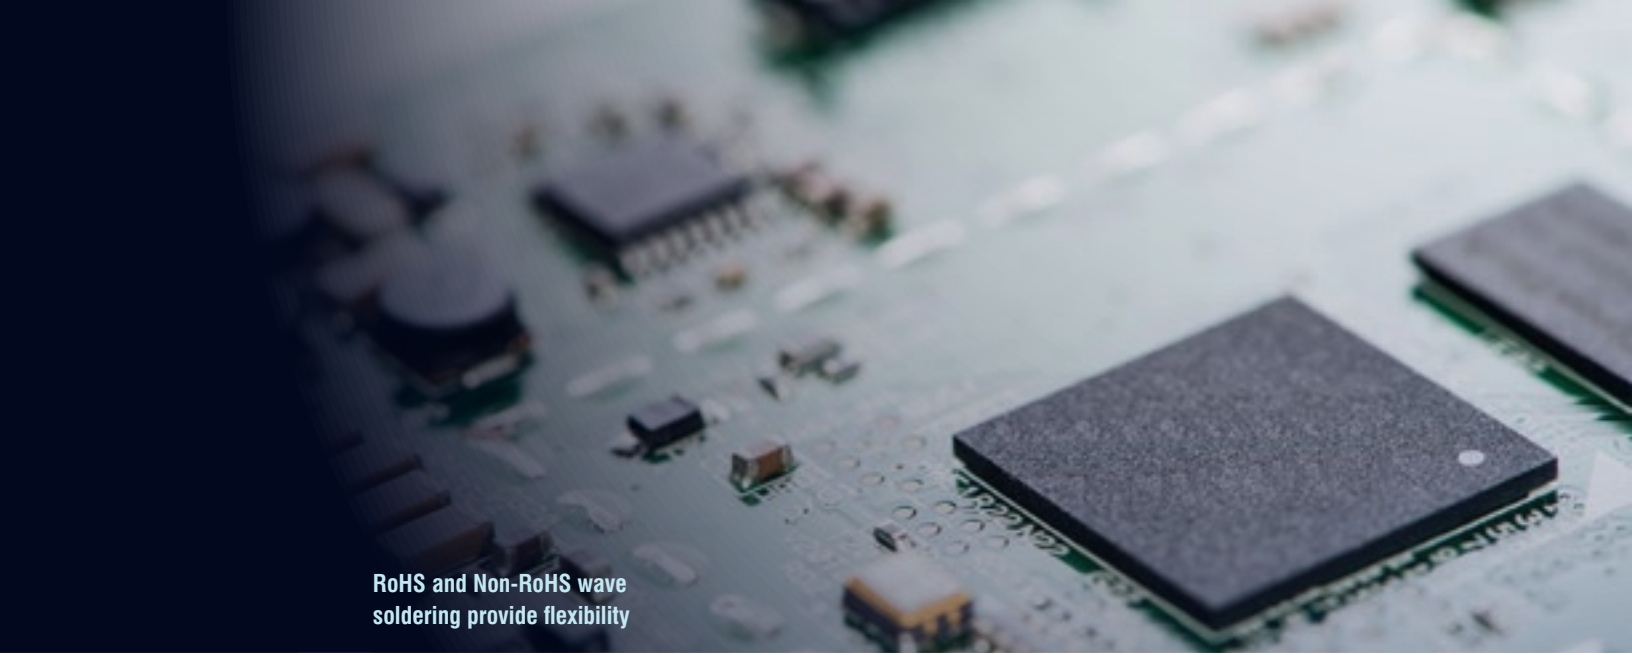

Precise optical inspection verifies components and orientation

Commitment

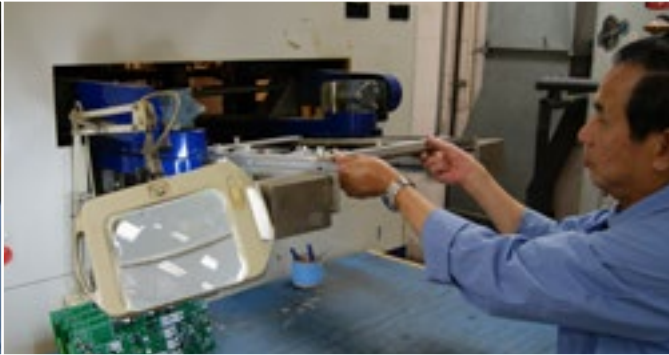

Your company's name, reputation and future are linked to every product you bring to market. For these reasons and more, selecting a reliable contract manufacturer for your electronic assemblies is a critical element of your success.

At Youngtron, we recognize and honor the trust you bestow upon us when you hire us to be a part of your production team. This is why we invest heavily in training, customer service, leading-edge capital equipment, and strict quality assurance to ISO 9001.

We are committed to developing long-term, mutually beneficial relationships with each of our clients. Whether you need a high volume run, or a prototype, when you select Youngtron, you can rest assured you will receive consistent quality and prompt delivery for every order.

RoHS and Non-RoHS wave soldering provide flexibility

State-of-the-art SMT equipment assures accuracy and high through-put

Our Capabilities

Youngtron possesses both the technical tools and expertise to assemble the latest-generation printed circuit board assemblies. Our capabilities include:

- Surface mount assembly equipment for accurate placement of components
- In-circuit and functional testing
- Fine-pitch and BGA placement
- Automated through-hole assembly
- RoHS and Non-RoHS assembly
- Automated vision inspection
- Conformal coating
- Turnkey procurement

We know how important it is to perform reliably. Our workmanship is crucial to the success of your products, and we take this responsibility seriously. Our operators and assembly teams perform to an ISO 9001 registered quality system.

We promise you:

- Consistent high quality
- Fast, flexible turnaround
- Competitive pricing
- Reliable, personal service
- Accurate communication

Youngtron's excellent reputation is known throughout the industries we serve. Make us an asset in your value chain.
